

Why choose Sawyer?

Here's what separates us from the big guys: low overhead, great service, fulfilled promises. We've worked for one of the "Big 50" remodelers; we know their procedures — and their markup.

At Sawyer, we have different values. Our mantra is "small and smart." When you sign our contract, you won't find yourself passed along to someone who doesn't know you, your project or the promises you've been given. At Sawyer, we're with you every step of the way. And we do great work, too.

What we offer

- ◆ The high quality of an industry leader ... without the high overhead.
- ◆ More than 15 years of combined on-the-job experience.
- ◆ Modeling software that will let you see what your project looks like before a single nail is driven.
- ◆ Creativity and expertise in design and product selections.
- ◆ Professionals who are friendly, reliable, trustworthy and respectful.

The Sawyer remodeling process

Finding a skilled, honest remodeler is crucial. They should be licensed and insured and provide a full list of references. If you pick Sawyer for your project, here's what you can expect:

Step 1: Design

- ◆ We assess your space to determine what's possible, what isn't, and what it might cost.
- ◆ Using your wants and needs as our map, we work with you to design a beautiful space that suits your home, family and budget.

- ◆ We help you navigate the often overwhelming array of products, materials, colors and finishes.

Step 2: Pre-construction

- ◆ We draft construction drawings, take care of permits and develop a schedule.

Step 3: Project management

- ◆ You get a complete job calendar so you'll know what's happening, and your own project manager to keep the job running smoothly.

Step 4: Completion

- ◆ We clean up the site and meet you for a final walk-through. When you're happy, we're happy!

Keith Nelson

For as long as I can remember, I've had a desire to create things with my hands. When I looked around for a career, remodeling seemed a natural choice. A business

degree taught me the numbers side of the industry; years of hands-on training taught me the construction side. I've done every sort of remodeling there is, as well as building entire houses from the ground up. Along the way I developed a speciality in log homes — using either kits or trees I cut myself. For a time I worked for a large remodeler, but I missed being able to run projects the way I thought they should be run.

Robin Ray

I fell in love with remodeling while taking a career break to raise my small children. After renovating three of my own homes, I

returned to college to study kitchen and bath design.

Certified Member

That led to a job at a large, high-end remodeling company. There I designed kitchens, bathrooms and spaces of all kinds, while managing construction projects ranging from simple bathroom upgrades to a million-dollar whole-home makeover.

I am certified by the National Kitchen and Bath Association as an Associate Kitchen and Bath Designer.

BEFORE

AFTER

From nondescript to knockout

Starting with a basic rambler, we added a full second floor and a hand-built log family room addition. This beautiful, unique residence features a two-story vaulted tongue-and-groove ceiling in the living room, a master suite and a metal roof.
